Material: Cirlex® Polyimide

Cirlex® is made from 100% DuPont Kapton® adhesiveless polyimide film. It is a product that delivers performance, value for all your demanding material applications, and an ideal match for environmental extremes. Fralock is Dupont’s sole licensee for the production of Cirlex® worldwide.

Seamless integration in polyimide.

If you are looking to replace current applications using ceramic or Vespel®, or upgrade to a new high performance polyimide materials, Cirlex® offers material flexibility and an expanded range of thickness options unattainable with cast resins or laminated constructions using adhesives.
