

DuPont™ Kapton® 100CRC

Product Description

DuPont™ Kapton® corona resistant film is a state of the art polyimide film that withstands the damaging effects of corona discharge.

The corona resistance of Kapton® 100CRC film provides improved service life and operational efficiencies beyond that of conventional insulation materials. In addition to the corona resistant properties, Kapton® CRC offers excellent, physical, electrical, thermal, and chemical resistant characteristics expected with Kapton® polyimide films.

Kapton® CRC polyimide film has been developed for use as an electrically insulating material for high voltage environments where the potential for corona discharge is present. Kapton® CRC is typically used in industrial motor and generator applications as magnet wire, turn to turn strand, coil, slot liner and ground insulation materials. It has also been used to form laminates with other materials, such as DuPont™ Nomex® paper or mica insulations, to provide a tailored electrical insulation property.

Applications

- AC Inverter Duty Motors
- Rail, Automotive Traction Motors
- Hydro, Wind Power Generators
- Transformers
