DuPont[™] Kapton[®] FWR

Polyimide Film

Product Description

DuPont[™] Kapton[®] FWR is a heat fusible polyimide-FEP fluoropolymer composite film that has a unique balance of excellent electrical, thermal durability, and chemical resistance properties. The properties of Kapton[®] FWR will provide a tough, high dielectric strength insulation with significantly improved hydrolysis resistance compared to other commonly used polyimide materials.

Kapton® FWR can be properly processed on most tape wrapping machines. It can be fused using either induction or radiant heat. Kapton® FWR films have a higher modulus and lower water vapor permeability than equivalent Kapton® FN films. The wire wrapping and sealing process may have to be modified to compensate for these differences.

Kapton[®] 150FWR019 film is constructed of a 1.0 mil Kapton[®] polyimide film with 0.5 mil of FEP fluoropolymer on one side. Kapton[®] 200FWR919 film is constructed of a 1.0 mil Kapton[®] polyimide film with 0.5 mil of FEP fluoropolymer on each side.

Characteristics

- Excellent hydrolysis resistance
- UL 94 recognition: V-0
- High dielectric strength
- Mechanically Tough
- Heat Fusible

Applications

- Magnet wire
- Traction motors: rail, auto, mining
- Industrial motor insulation
- Wind, hydro generators
- ESP motors
- High temperature
- High reliability
- Aerospace and specialty wires
